EDUCATION

Holy Angel University Angeles City, Pampanga
Bachelor of Science in Computer Science 2023–Present
Relevant Coursework: Dean's Lister 1st and 2nd Semesters A.Y. 2023–2024; President's Lister 1st and 2nd Semesters A.Y. 2024–2025; President's Lister 1st and 2nd Semesters A.Y. 2025–2026

Holy Angel University Angeles City, Pampanga
Information and Communication Technology Strand 2021–2023
Recognized With Honors S.Y. 2021-2022; Graduated With Honors S.Y. 2022-2023

PROJECT EXPERIENCE

CapsiCAM – Chili Pepper Leaf Disease Classification Mobile Application
Group Thesis Project | UI/UX Design, Full-Stack Developer
- Developed a Flutter mobile application integrating TensorFlow Lite models to classify chili pepper leaf diseases from captured or uploaded images.
- Implemented Supabase authentication, cloud storage, scan history, and classification results with confidence scores and visual heatmaps.

HAUlam — Campus Food Stall Discovery Mobile Application
Group Project | UI/UX Design, Backend Developer
- Developed backend functionality for a Flutter application that helps students discover campus food stalls, browse available meals, and save favorites.
- Integrated Supabase for user authentication, database operations, and cloud-based management of application data.

StardewFest — Stardew Valley Festival Guide Website
UI/UX Design, Frontend Developer
- Developed a responsive, game-themed website providing information on seasonal festivals, schedules, locations, and activities in Stardew Valley.
- Designed and implemented interactive navigation and user-friendly layouts using HTML, CSS, and JavaScript.

Stardew Perfection Tracker — Progress Tracking Web Application
UI/UX Design, Frontend Developer
- Built an interactive React application that allows players to track Stardew Valley perfection objectives through categorized checklists and progress indicators.
- Implemented a progress dashboard and browser-based data persistence using localStorage, allowing users to retain their progress across sessions.

HAUMonsters — Location-Based Monster-Catching Web Application
Group Project | Full-Stack Developer
- Developed features for a Pokémon-inspired web application that allows users to discover and catch virtual monsters through GPS-based location detection.
- Contributed to player authentication, monster collection management, interactive maps, and leaderboard functionality.

LEADERSHIP & ACTIVITIES

Central Board of Students (CBS) — St. Joseph College – Olongapo Inc.
Grade 10 Representative — June 2020 – March 2021

Camera Club — St. Joseph College – Olongapo Inc.
Secretary — June 2019 – March 2020

Youth for Environment in Schools Organization — St. Joseph College – Olongapo Inc.
Video Editor — June 2019 – March 2020

SKILLS & INTERESTS

- **Programming Languages & Frameworks:** Java, Python, PHP, JavaScript, Dart, Flutter
- **Web Development:** HTML, CSS, React, Node.js, Express.js
- **Databases:** MySQL, PostgreSQL, Supabase
- **Development Tools & Cloud:** Git, GitHub, Docker, AWS
- **Design & Multimedia:** Figma, Adobe Photoshop, Canva
- **Productivity Tools:** Microsoft Powerpoint, Microsoft Excel, Google Sheets

CERTIFICATIONS

- **Data Analytics Essentials —** Cisco | March 2026
- **Artificial Intelligence Fundamentals —** IBM | March 2026
- **AWS Academy Graduate - Cloud Foundations - Training Badge —** Amazon Web Services (AWS) | March 2026
- **Endpoint Security —** Cisco | August 2025
- **Relational Database V8 —** freeCodeCamp | February 2025
- **JavaScript Essentials 1 —** Cisco | October 2024
- **Introduction to Figma —** Simplilearn | September 2024
- **Legacy Responsive Web Design V8 —** freeCodeCamp | August 2024
